

Swing Gate

DIY Automation Kits

These heavy duty, automatic swing gate kits have everything you need to convert your existing swing gate(s) into an automated system.

Automatic gates provide added security to your property, and also eliminate the need to leave your car to open and close the gate. The **GTR058** and **GTR100** swing gate kits plug into a 240V power point and don't require an electrician for installation.

**This kit is suitable for single arm gates up to 400kg or 5m*

Single Swing Gate

DIY Automation Kit

Model: GTR100

KIT CONTENTS

- 1 x Gate Swing Arm
- 1 x Control Box
- 2 x Remote Controls
- 1 x Instruction Manual
- Brackets, Fittings & Hardware

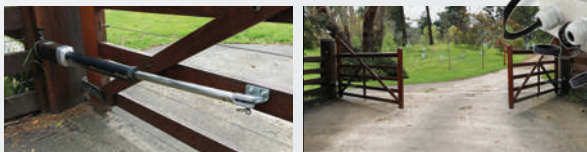

Double Swing Gate

DIY Automation Kit

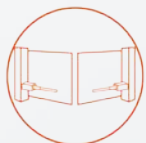

Model: GTR058

KIT CONTENTS

- 2 x Gate Swing Arms
- 1 x Control Box
- 2 x Remote Controls
- 1 x Instruction Manual
- Brackets, Fittings & Hardware

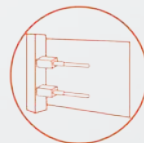

**This kit is suitable for double arm gates up to 400kg or 5m per gate. It is also suitable for heavy single gates up to 750kg or 7m (with both motors on a single gate arm).*

ONE MOTOR PER GATE ARM

With a swing motor on each gate arm this kit can convert your double swing gate, or two individual swing gates into automatic gates.

TWO MOTORS PER GATE ARM

Both kit motors can be applied to a single heavier gate. This allows for a larger gate to be converted into an automatic gate.
